Wincon Side:

First, you must get ip address of the wincon8000. You can double click the icon that is like Figure 1.

Then you will see the detail of the LAN LINK. (Example: 192.168.100.13)

LAN90001				×
IP Information				
	Internet Protocol (1	rcp/IP)		
	Address Type:	DHCP		
	IP Address:	192.168.100.13		
	Subnet Mask:	255.255.255.0		
	Default Gateway:	192.168.100.1		
			Details	
	Renew			

Figure1

When you get this IP address, you can use PC client Wincon8000 by TELNET or FTP.

PC Side:

FTP:

Open the IE, and type the IP address that you got in wincon before into IE's Address. (Example: ftp://192.168.100.13)

Figure2

Telnet:

Choose Start->Run

Type the command "telnet (wincon8000's IP address)".

(Example: telnet 192.168.100.13)

If it works, it will show you as is like as figure3.
