**WARNING:** These products are not designed for use in, and should not be used for, patient-connected applications.

This document describes how to install the software included with the OME series data acquisition (DAQ) devices on a Windows 95/98/NT/2000 computer. All of the drivers have their own setup programs and have similar installation steps. This manual uses the OME-PCI-TMC12 card as an example.

Run the DAQ card's setup program from user's CD-ROM drive. The directory depends on the user's CD drive and path. Follow the steps below to finish the software installation. Refer to Figure 1 to 4.

Figure 1: Run the appropriate setup program from the CD-ROM drive.

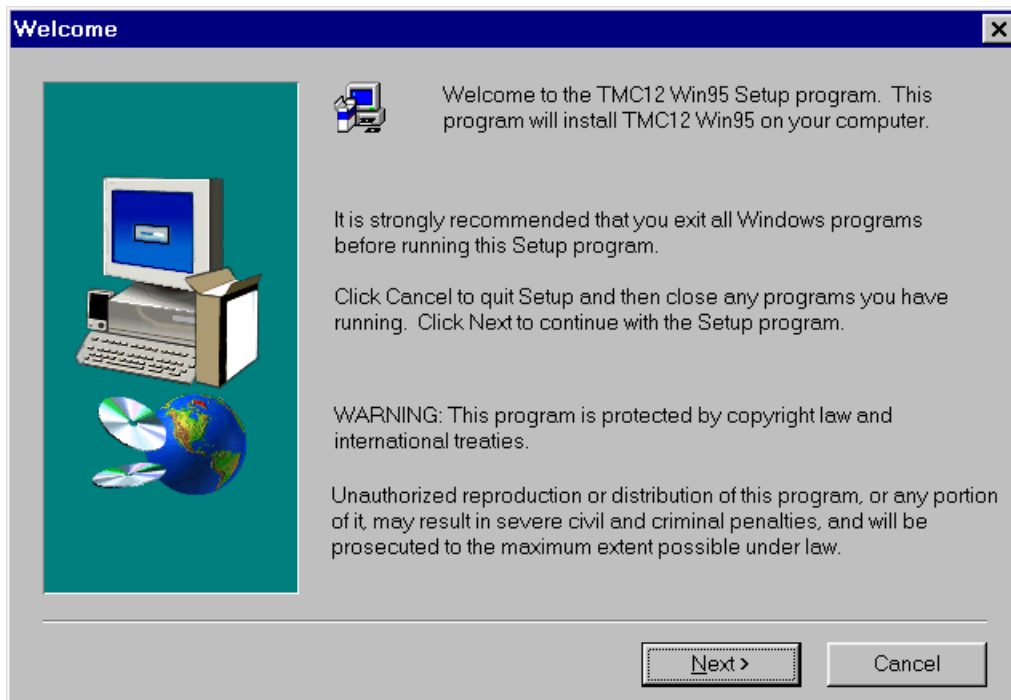

Figure 2: Click the button “Next >”.

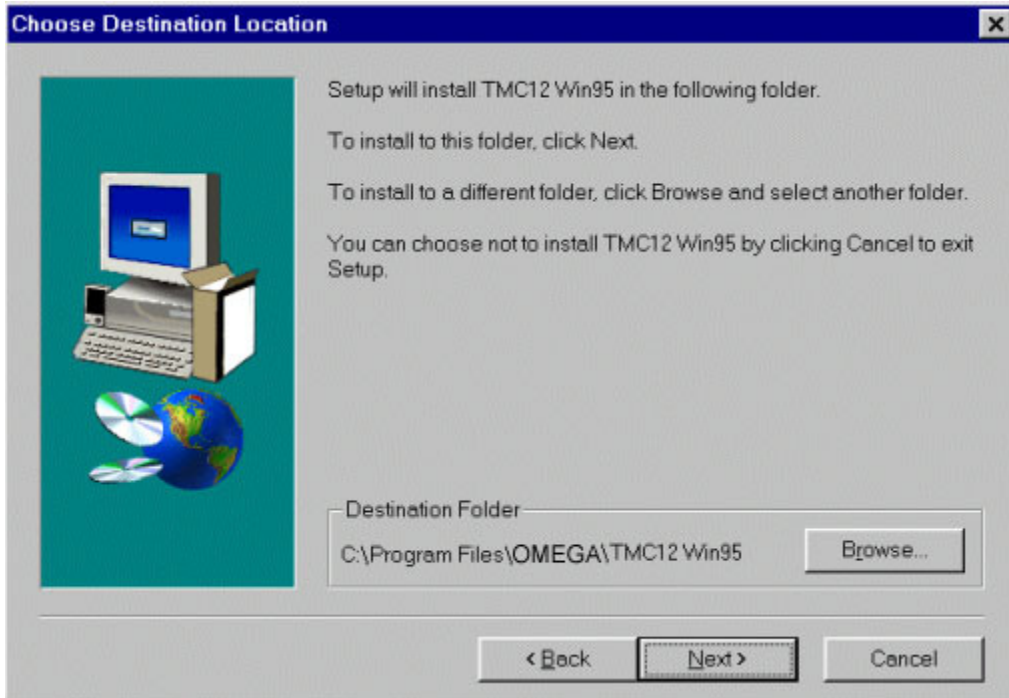

Figure 3: Click “**Browse...**” to select the folder where the software will be installed and then click “**Next >**”.  
This folder will contain the software for the DAQ card.

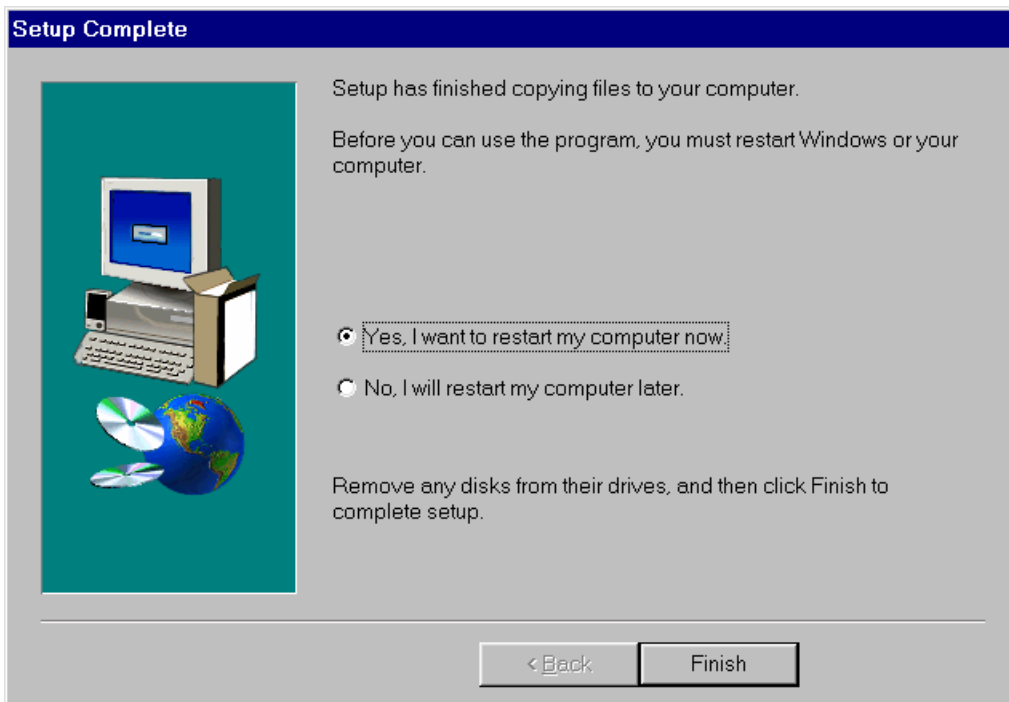

Figure 4: Select “**Yes, I want to restart my computer now**” and click the “**Finish**” button to restart the computer.

This ensures that OMEGA's customers receive maximum coverage on each product.

If the unit malfunctions, it must be returned to the factory for evaluation. OMEGA's Customer Service Department will issue an Authorized Return (AR) number immediately upon phone or written request. Upon examination by OMEGA, if the unit is found to be defective, it will be repaired or replaced at no charge. OMEGA's WARRANTY does not apply to defects resulting from any action of the purchaser, including but not limited to mishandling, improper interfacing, operation outside of design limits, improper repair, or unauthorized modification.
