Solution:

This problem is SDK install file parameter error, so you can't install. You must download other SDK install file can solve this problem. The SDK install file has place in

<ftp://ftp.icpdas.com/pub/cd/xp-8000-ce6/sdk/platformsdk/>

If visual studio 2005 is only installed on your PC, you just only install XPacSDK_CE_1.3.3_VS2005.msi.

Correspondingly, install VS2008 only and only install XPacSDK_CE_1.3.3_VS2008.msi.

Both of VS2008 and VS2005 are installed on PC and recommended you to install XPacSDK_CE_1.3.3_VS2008.msi.
