# How to build a HMI screen by using ISaGRAF?

Spotlight is a simple HMI coming with ISaGRAF which allows user to build **Boolean Icon, Bar Graph, Trend Curve, Value Text, Bitmap Picture** to make application more friendly.

# **14.1 A Spotlight Example:**

This Demo example can be restored from the ICP DAS's I-8000 CD-ROM - "demo\_37" (For I-8xx7). Please refer to Chapter 11 to restore it.

Name	Туре	Attribute	Description
INIT	Boolean	Internal	Only = TRUE at the 1st scan cycle, <b>INIT value is TRUE</b>
L1	Boolean	Output	Output 1, connect to Ch1 of "show3led"
L2	Boolean	Output	Output 2, connect to Ch2 of "show3led"
L3	Boolean	Output	Output 3, connect to Ch3 of "show3led"
Button1	Boolean	Inpput	Input 1, connect to Ch1 of "push4key"
Button2	Boolean	Inpput	Input 2, connect to Ch2 of "push4key"
Button3	Boolean	Inpput	Input 3, connect to Ch3 of "push4key"
Button4	Boolean	Inpput	Input 4, connect to Ch4 of "push4key"
VAL_OUT	Integer	Internal	to set blinking period, initial value is set at 500 (unit:ms)
OLD_VAL_OUT	Integer	Internal	Old value of VAL_OUT
T1	Timer	Internal	Time Period of blinking
MSG1	Message	Internal	Status report, please set its Maxinum Length to 48

#### Variables used In the example:

## HMI screen outline:

Project architecture:

🞇 ISaGRAF - Project Management

📷 demo_34 Spotlight Demo	• ISaGRAF - DEMO_37 - Programs
📠 snl 🔺 Hustusta	<u>File Make Project Tools Debug Options H</u> elp
Reference : Ch14	🖹 🖬 😵 🗐 🗋 💼 💥 🗱 📾 🙀 🛠 🖳 😫
	- Begin: 🗰 st init
	🔜 🔤 Demo
project name: demo_37	End: 🕮 end_init
	Begin: st_init (Structured Text)

ST Program "st\_init" in the "Begin" area :

```
(* Do some init action *)
if INIT=TRUE then
 T1 := TMR(VAL_OUT) ; (* Convert integer: VAL_OUT to Timer: T1 in ms *)
MSG1:='OK.';
 OLD_VAL_OUT := VAL_OUT ; (* init OLD value *)
end_if ;
(* if set a new value to VAL_OUT *)
if VAL OUT <> OLD VAL OUT then
 (* VAL_OUT is acceptable *)
if (VAL_OUT>=200) & (VAL_OUT<=5000) then
  T1 := TMR(VAL_OUT); (* Convert integer: VAL_OUT to Timer: T1 in ms *)
 MSG1 := 'OK.' ;
     (* VAL OUT out of range *)
 else
  MSG1 := 'VAL_OUT should be between 200 and 5000 .';
 end if;
 OLD_VAL_OUT := VAL_OUT ; (* update OLD value *)
end_if ;
```

ST Program "end\_init" in the "End" area :

**INIT := FALSE ;** 

LD Program "Demo" in the "Begin" area:

**Operations** :

The status of four push buttons will be displayed on the HMI screen The first output will be blinking with the period defined by "VAL\_OUT" in ms Value of "VAL\_OUT" can be modified from the HMI screen The second and third output "L2" & "L3" can be controlled by the HMI screen. The Value of "VAL\_OUT" will also be displayed on the front panel of the controller.

## Steps to build a Spotlight: HMI screen:

Complete this Demo project as described above. After you finish it. Compile it to make sure there is no error.

Copy all files inside "ICO" folder to the associate directory of your project. The "ICO" folder contains some boolean icon files already bulit by ICP DAS. They can be found from the ICP DAS's CD-ROM : \napdos\isagraf\ICO\

For example, this demo project is inside group "spotligh" and the project name is "demo\_37", then copy CD-ROM:  $\accurrent{loc}\acurrent{loc}\accurrent{loc}\accurrent{loc}\accurrent{loc$ 

If the "ICO" folder is not found in your CD-ROM. Please download it from the below site. <u>ftp://ftp.icpdas.com/pub/cd/8000cd/napdos/isagraf/</u>

Get into the Spotlight editor.

Click on "Simulate", then click on "Spotlight" to open spotlight editor.

A "SpotLight" window will appear as below.

🗩 IS	aGRA	F - D	EMO	D_34	:[unt	itled]	- Sp	otLigh	ıt								<u>- 0 ×</u>
