

# VP-25Wx Release Notes

## Choose what version of OS for new hardware?

Use OS Ver.2.0.0.0 and later for new hardware with Samsung K8 70ns Flash chip.

## Hardware Revision:

As the Intel 95ns Flash chip has been phased out, the chip in the VP-25Wx has been replaced with a Samsung K8 70ns Flash chip. Thus the OS and Eboot software for the VP-25Wx must be updated to version 2.0.0.0 (or later of the OS) and 1.1.0.1 (or later of the Eboot) to support both versions of the Flash chip.

Also please note, older versions of the OS and Eboot software will not work on VP-25Wx modules that are equipped with the new Samsung K8 70ns Flash chips, so earlier version of the OS and Eboot software should not be installed else the ViewPAC will not boot.

	Original J3 Flash Chip (95ns)	New Flash Chip(Samsung K8 70ns)
Eboot (Ver. 1.0.1.1 and earlier)	Ok	Not working
Eboot (Ver. 1.1.0.1 and later)	Ok	Ok
OS (Ver. 1.1.0.1 and earlier)	Ok	Not working
OS (Ver. 2.0.0.0 and later)	Ok	Ok

# VP-25Wx Release Notes

## How to determine the type of the Flash chips Via the WinPAC Utility Ver. 2.0.2.0

### New Samsung K8 Flash Chip

ViewPAC Utility [2.0.2.0]

File Help Configuration

System Setting Ethernet Setting FTP Setting System Information Auto Execution Multi-serial p

Slot 0:	8135	Module Type:	VP-25xx (96MB)
Slot 1:		Flash Type(System_disk):	Samsung K8 70ns
Slot 2:		Flash Type(OS):	Samsung K8 70ns

### Original Flash Chip

ViewPAC Utility [2.0.2.0]

File Help Configuration

System Setting Ethernet Setting FTP Setting System Information Auto Execution Multi-serial p

Slot 0:		Module Type:	VP-25xx (96MB)
Slot 1:		Flash Type(System_disk):	Intel J3 95ns X 1
Slot 2:		Flash Type(OS):	Intel J3 95ns X 2

# VP-25Wx 注意事項

## 新硬體需配合哪個版本之後的 OS?

新硬體需使用 Ver.2.0.0.0 之后的 OS 版本. 新硬體是指 Flash chip 使用 Samsung K8 70ns Flash chip.

## 硬體改版:

Intel 的 95ns Flash Chip 已經停產，VP-25Wx 將使用另一個 Samsung K8 70ns Flash chip 進行取代。因此，必須將 OS 及 Eboot 更新到 2.0.0.0 及 1.1.0.1 之後的版本，以同時支援這兩種 Flash Chip。

但是必須注意的是，舊版的 OS 及 Eboot 在配備新版 Samsung K8 70ns Flash Chip 的 VP-25Wx 上將無法正常運作。請勿將舊版 Eboot 及 OS 安裝到配備新的 Samsung K8 70ns Flash Chip 的 VP-25Wx 上，以免造成無法開機的問題。

	Original J3 Flash Chip (95ns)	New Flash Chip(Samsung K8 70ns)
Eboot (Ver. 1.0.1.1 and earlier)	Ok	Not working
Eboot (Ver. 1.1.0.1 and later)	Ok	Ok
OS (Ver. 1.1.0.1 and earlier)	Ok	Not working
OS (Ver. 2.0.0.0 and later)	Ok	Ok

# VP-25Wx 注意事項

如何辨識新、舊版的 Flash Chip ?

透過使用 WinPAC Utility 2.0.2.0 版
