WISE MQTT APP User Guide

1：Please visit WISE Web site, go to the Utility section of the Download page (http://wise.icpdas.com/Download.html), and download the installation file of WISE MQTT APP.

PS：Currently the APP is only supported by Android.

2：If this is the first time to launch the APP, the system will automatically guide you to the Setting page for the Broker setting.
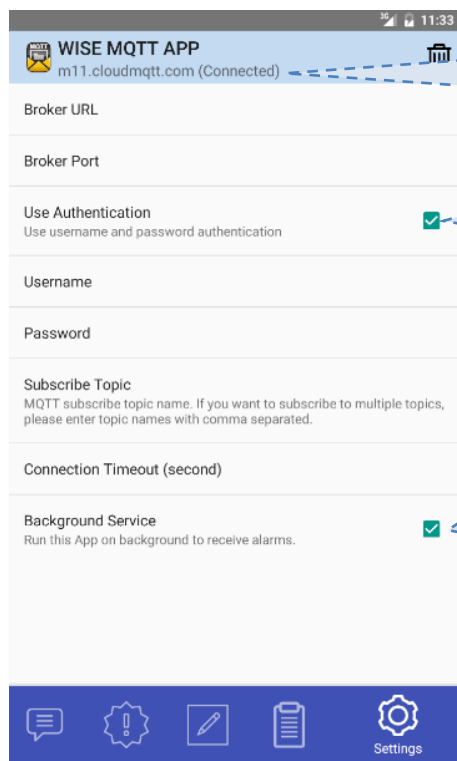

If the connection to the Broker is connected successfully, the "Connected" message will be shown.

If the Broker requires the authentication information for the connection, please check this box and input the Username and Password.

Check this box to enable the APP for Background Process execution. The user will be able to receive the Alarm messages immediately.
3 : Enjoy the convenience the WISE MQTT APP brings to you.
