## How to enable Microsoft .NET Framework 3.5 or newer on your operating system?

Applies to:						
Platform	OS version	DCON Utility Pro Version				
PC	Windows 8	All Versions				
	Windows 8.1					
	Windows 10					

In order to use DCON Utility Pro, Microsoft .NET Framework 3.5 Feature (which includes .NET Framework 2.0 and .NET Framework 3.0) needs to be enabled.

## Installing .NET Framework 3.5 on demand

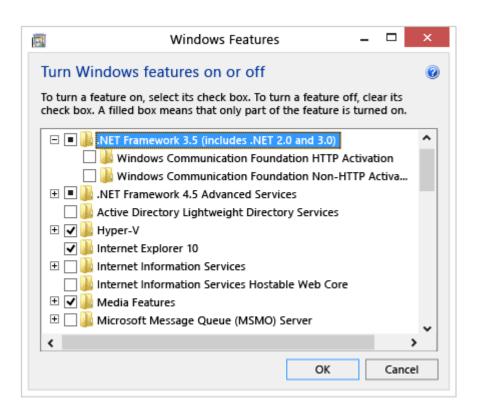

You may see the following configuration dialog if you try to run the DCON Utility Pro that requires the .NET Framework 3.5. Choose **Install this feature** to enable the .NET Framework 3.5. This option requires an Internet connection.

To enable Microsoft .NET Framework 3.5 (which includes .NET Framework 2.0 and .NET Framework 3.0), complete the instructions listed below for your particular operating system:

- 1. Press the Windows key Windows on your keyboard, type "Windows Features", and press Enter. The Turn Windows features on or off dialog box appears.
- 2. Select the .NET Framework 3.5 (includes .NET 2.0 and 3.0) check box, select OK, and reboot your computer if prompted.

You don't need to select the child items for **Windows Communication Foundation (WCF) HTTP Activation** and **Windows Communication Foundation (WCF) Non-HTTP Activation** unless you're a developer or server administrator who requires this functionality.
